PRESS RELEASE: LUDLOW DIGITAL LOCK SERIES with Smart Card GRADE 1

AUGUST 15, 2014

New Product Introduction- In Stock- Ready to ship!

S. Parker Hardware is proud to introduce a new member of the GRADE 1 entry lockset category. Available in US26D, US10B, US03, US26D-IC.

S. Parker "State of the Art" Stand Alone Touchscreen Digital Access Clutch Lever Lock for 1,000 users

S. Parker Ludlow on screen programmable keypad allows up to one thousand 6 digit codes. Ludlow can create 1 master code, 3 manager codes and 1,000 user codes up to 6 digits on pad or using the "Smart Card" proximity card, which employs RF technology for greatly increased encrypted security protection. One time user codes are available. "Smart Card" is programmable on digital screen. Ludlow uses 4 AA batteries (included) rated for up to 50,000 cycles. Low battery alert symbol, emergency 9V battery for activation if batteries are dead and standard SC1 key override cylinder for key entry.

Activation bar below screen saves battery life. Highly weather resistant with high impact resistant screen, GRADE 1, UL/CUL, certified ANSI/BHMA A156.2 Series 4000. ADA compliant for barrier-free accessibility. Complies with California State Codes. Pressure cast zinc construction, all metal escutcheon provide quality and durability for interior and exterior installations. Non-handed reversible for easy field changing.
